

CAPABILITY STATEMENT

*Tailored, comprehensive
solutions that meet
the unique needs of
government agencies.*

Innovus Partners is a premier IT consulting joint venture formed under the SBA 8(a) Mentor-Protégé Program. As a collaboration between **MAJUS Consulting, LLC** and **Insignia Federal Group**, our combined 25 years of service in the industry allows Innovus Partners to deliver cutting-edge technology solutions, program management, and business transformation services to federal agencies. Combining the expertise of both firms, Innovus Partners provides agile, innovative, and mission-driven solutions that enhance operational efficiency and ensure compliance with federal regulations.

CORE COMPETENCIES

Digital Transformation & Modernization

Capabilities include:

- Web modernization and CMS platforms (Drupal, enterprise web architecture)
- Secure and Scalable Cloud Infrastructure
- DevSecOps implementation and CI/CD pipelines
- AWS cloud architecture and migration
- Data engineering and analytics platforms
- AI-enabled insights and reporting.

AI, Data Science, and Intelligent Automation

Capabilities include:

- Automation engineering and AI-enabled testing (MAJUS' n-Alt™ is a next-generation AI testing framework)
- Robotic Process Automation (RPA)
- Intelligent workflow automation
- Natural language processing solutions
- Automated quality assurance frameworks.

Human Experience Design (HxD) & User Experience

Capabilities include:

- Custom Drupal Module Dev
- Concurrent UX and Dev Sprints
- Secure, Standards-Compliant Web Builds, (NIST, FISMA, and the 21st Century IDEA Act)
- WCAG 2.2 AA Accessibility Testing (automated/Deque AxeDevTools & manual/JAWS, NVDA)
- Automated CI/CD pipelines and testing.

Agile and Adaptive Application Development

Capabilities include:

- Agile Program Management
- Product Ownership and Backlog Management
- Stakeholder Engagement and Change Management
- Performance Measurement and Reporting
- Risk Management and Quality Assurance.

COMPANY DATA

Legal Name: Innovus Partners, LLC

Headquarters: Olney, MD

SAM UEI: KYRAEE8QCV64

CAGE: 9U3A0

Socioeconomic Designations

- **8(a)** SBA-certified 8(a) mentor-protégé joint venture (JV)
- Maryland Department of Transportation
(**MBE, DBE, SBE**) Certified

Contract Vehicles

GSA MAS – IT and Health 47QTCA26D0057

NAICS Codes

541511, 541512, 541513, 541519, 541611,
541612, 541618, 541690, 541840, 541990

Corporate Certifications

ISO 9001:2015, ISO 20000-1:2018
ISO 27001:2022, CMMI Dev3

DIFFERENTIATORS

User-Driven Innovation that Simplifies Complexity

- Our innovations evolve from the need of the customer and user.
- AI-Powered digital solutions to ingest requests, make decisions, and execute actions with minimal human intervention.
- We make the complex clear, delivering scalable and efficient solutions with improved speed, accuracy, and consistency that drive results.

Agile at Scale & Proactive Talent Readiness

- We blend speed, adaptability, and built-in quality to drive lasting impact across complex federal environments.
- Apply Agile and Lean methods to eliminate silos, reduce handoffs, and accelerate value delivery.
- Improve coordination across teams, vendors, and stakeholders while increasing delivery predictability.
- We have the right talent in place ahead of demand.

Human-Centered, Mission-Aligned Modernization

- Embed human-centered design, user research, and continuous feedback into all solutions to align with real user and mission needs.
- Deliver intuitive, accessible, and Section 508-compliant systems that drive adoption and improve decision-making.
- Ensure usability, compliance, and mission impact are built into solutions from the start.

Secure, Innovation-Ready Delivery in Regulated Environments

- Deliver solutions aligned with CMMI Dev Level 3 and ISO 9001, 20000, and 27001 standards for quality, service management, and security.
- Integrate security, compliance, and governance directly into delivery workflows to enable continuous authorization, audit readiness, and risk reduction.
- Field high-impact, innovation-ready teams that continuously improve performance while ensuring consistent, audit-ready delivery.

PAST PERFORMANCE

Food and Drug Administration (FDA)

Automation Engineering & Program Management

- Delivered automation engineering and testing support across FDA applications within hybrid Azure and AWS environments.
- Streamlined requirements intake and roadmap planning using Agile workflows and stakeholder-facing dashboards.
- Instituted regular cross-team coordination to improve release predictability and risk visibility across programs.

Department of Labor (DOL)

Digital Experience and Web Modernization Support

- Supported DOL digital experience and Drupal modernization efforts across public-facing and mission-support web platforms, including Drupal development, CMS configuration, content support, and platform enhancements.
- Applied human-centered design, accessibility, and quality assurance practices to improve usability, maintainability, performance, and Section 508/WCAG compliance.
- Used Agile delivery, stakeholder coordination, and secure web development practices to support predictable releases, continuous improvement, and federal digital modernization priorities.

Agency for Healthcare Research and Quality's (AHRQ)

Digital Modernization & DevSecOps

- Modernized AHRQ digital platforms across web, mobile, and cloud
- Integrated DevSecOps to accelerate delivery, strengthen security, and improve performance and user experience.
- Led integrated Agile delivery across programs, embedding human-centered design to align stakeholder needs, improve usability, and drive consistent, high-quality digital service delivery.

U.S. Air Force

Electronic Health Record Operations & Medical Device Integration

- Supported Electronic Health Record operations through simulation and readiness activities designed to prepare users and systems for deployment.
- Assisted with wireless medical device integration into the DoD EHR environment, helping connect clinical devices with enterprise health record workflows.
- Provided mission-focused technical support in a regulated healthcare environment requiring reliability, interoperability, and operational readiness.

Innovus Partners bring a vast combined proven experience across several additional federal agencies.
